1. Purpose of this article

This article aims to show you how to create a pulse button.

The pulse button can be used to change the value of a tag from a pulse. During the moment it is pressed, it will change the tag value and after releasing the button, the value will return to the initial value.

2. Creating a Pulse Button

Insert a button on the screen, and with the button selected, open the script area. In the Mouse Up event, insert the script below, replacing it with your tag name.
